### **DETAILED ACTION**

1. Claims 58-82 remained pending in this Application.

#### **Election/Restrictions**

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I.. Claims 58-66, drawn to a system and method of performing wireless communication processing within a computer, classified in class 455, subclass 411.
  - II. Claims 67-82, drawn to a system for business processing using cryptography, classified in class 705, subclass 50.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are further unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated because as can be seen above each of the invention intends to accomplish a different result using different steps or functions. Invention of Group I does not require an electronic wallet and the function of managing of electronic values using a public key encryption for processing a transaction settlement as required in the invention of Group II, claims 67-82.

Also, the invention of Group II does not require a wireless communication session with a terminal within a distance for communicating with terminal using a received information as required in Group I, claims 58-66.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group 1 is not required for Groups 2 or 3, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
